Aspiring Full-Stack Developer focused on backend engineering, databases and practical web applications. Trained through Life Choices Academy's YouthCode programme, with hands-on project experience building responsive interfaces, server-side functionality, database-driven features and API integrations. Curious, analytical and adaptable, with a strong interest in solving problems through thoughtful software design.

PROJECTS

StockWell — Vue.js, Node.js/Express, MySQL, PayFast
Built a full-stack stock procurement platform supporting group purchasing workflows. Implemented role-based approvals, proposal creation, majority voting, supplier comparisons, cart and wallet functionality, PayFast payment integration, and order and delivery flows.

ModernTechHR — JavaScript, HTML, CSS, Chart.js
Developed an employee-management application with payroll calculations, employee search and filtering, modal interactions, responsive layouts and dynamic interface updates. Used Chart.js to present information visually.

Lightning News — Vue.js, Three.js, Python, Flask, Web Scraping
Created a news-focused web application combining a Vue.js interface with a Python/Flask backend. Worked with web-scraping tools including Requests, BeautifulSoup and lxml, and used Three.js for interactive visual elements.

Voya Bite — Web Application
Developed a food-related web project as part of a portfolio of practical application work. Project showcase: Live project.

Python Budget Tracker Mini Toolkit — Python
Built a Python-based budgeting toolkit to practise programming fundamentals and problem-solving. Source code: GitHub repository.

EDUCATION

Full-Stack Web Development
Life Choices Academy | 2025–2026

12-month full-stack development programme covering coding foundations, professional development and practical project work, with experience across frontend development, backend development, databases and application deployment.

National Senior Certificate
Kuilsriver Technical High School | Graduated 2024

Relevant subjects: Pure Mathematics, Life Sciences, Physical Sciences and History.

TECHNICAL SKILLS

Languages & Frameworks
- JavaScript
- Vue.js
- Node.js / Express
- Python / Flask
- PHP
- HTML5 & CSS3

Databases & Backend
- MySQL
- PostgreSQL
- REST APIs
- Authentication & sessions
- Database-driven applications
- Web scraping

Tools & Integrations
- Git & GitHub
- Render deployment
- PayFast integration
- Chart.js
- Three.js

Professional Skills
- Analytical and logical thinking
- Problem-solving
- Research and data analysis
- Project planning
- Communication and teamwork
- Adaptability
- Time management

LANGUAGES

- English
- Xhosa

CAREER FOCUS

Backend development, backend architecture, APIs and integrations, databases, and the development of reliable, user-focused web applications.
