PROFILE

Aspiring full-stack developer focused on backend engineering, databases and practical web applications. Trained through Life Choices Academy's YouthCode programme, with hands-on experience building responsive interfaces, server-side functionality, database-driven features and API integrations. Curious, analytical and adaptable, with a strong interest in solving problems through thoughtful software design.

PROJECT EXPERIENCE

StockWell | Vue.js, Node.js / Express, MySQL, PayFast
Built a full-stack stock procurement platform supporting group purchasing workflows. Implemented role-based approvals, proposal creation, majority voting, supplier comparisons, cart and wallet functionality, PayFast payment integration, and order and delivery flows.

ModernTechHR | JavaScript, HTML, CSS, Chart.js
Developed an employee-management application with payroll calculations, employee search and filtering, modal interactions, responsive layouts and dynamic interface updates. Used Chart.js to present HR information visually.

Lightning News | Vue.js, Three.js, Python, Flask
Created a news application combining a Vue.js interface with a Python / Flask backend. Used Requests, BeautifulSoup and lxml for web scraping, and Three.js for interactive visual elements.

Voya Bite | Web Application
Developed a responsive travel discovery and booking interface with curated activities, filtering and booking interactions.

Python Budget Tracker Mini Toolkit | Python, Vue.js, Flask, PostgreSQL
Built a budgeting and productivity application with persistent transactions, configurable budget periods, task management and study planning.

EDUCATION

Full-Stack Web Development | Life Choices Academy, 2026-2027
12-month programme covering coding foundations, professional development and practical project work across frontend development, backend development, databases and application deployment.

National Senior Certificate | Kuilsriver Technical High School, 2024
Relevant subjects: Pure Mathematics, Life Sciences, Physical Sciences and History.

CERTIFICATIONS & PROFESSIONAL LEARNING

- Cisco - Introduction to Cybersecurity | 1 September 2026
- Cisco - Introduction to Data Science | 1 September 2026
- Scrum Fundamentals Certified (SFC) - ScrumStudy | 3 November 2026
- Business Analysis Fundamentals Certified (BAFC) - BA Learning | 3 November 2026
- Advanced C++ | In Progress
- Foundational C# - Microsoft | In Progress

TECHNICAL SKILLS

Languages & Frameworks
JavaScript, Vue.js, Node.js / Express, Python / Flask, PHP, HTML5, CSS3

Databases & Backend
MySQL, PostgreSQL, REST APIs, authentication and sessions, data-driven applications, web scraping

Tools & Integrations
Git, GitHub, Render, PayFast, Chart.js, Three.js

CORE STRENGTHS

Analytical and logical thinking
Problem-solving
Research and data analysis
Project planning
Communication and teamwork
Adaptability
Time management

CAREER FOCUS

Backend development, backend architecture, APIs and integrations, databases, and building reliable, user-focused web applications.

LANGUAGES

English
Xhosa
